XM Camera Quick Setup Steps

- 1. This camera supports blue iris software, the camera's protocol please select xmeye if you use blue iris.
- 2. This camera also supports RTSP Setting methods

1.open you router 554 port

- 2.open VLC media player
- 3. In the "Enter Network URL:" Fill

rtsp :// 192.168.1.10:554 / user = admin & password = & channel = 1 & stream = 0.sdp?

192.168.1.10 The device is connected to IP

: 554 This is the RTSP service port number, you can change the device inside the network

services

user = admin This is the device's login user name

password = password empty

channel = 1 the first channel

- stream = 0.sdp? Main Stream .
- 3. This camera supports onvif. If you want to use it with NVR, please confirm your NVR can also support onvif. If yes, then you can add camera's IP to your NVR to surveillance image

Generally we suggest to use our software which is more better to surveillance and operate

The way of get camera's IP and how to use CMS software

- First, connect camera to router (don't connect camera to Modem, otherwise you can't find camera's IP), connect the camera to DC 12V power supply. If you have a 48V POE switch and your camera supports POE, you can connect the camera directly to the switch.
- Generally, if you have connected it correctly, the green LED on the RJ45 cavke port of camera start to flash. Wait about 20-30 seconds, you can hear the sounds of IR-CUT which inside of the camera At night or in the dark, camera's LED will emit red light.

The Steps of use CMS software

1. Open or download CMS software, install it to windows PC which connect the same router with your camera
